### Soft skills

- Good self-study ability
- Independent working and teamwork
- Experience with Agile Process and Scrum Methodologies.
- Reading and understanding technical documents in English

### Hobbies

- Watching tv
- Listening to music
- Singing karaoke with family

## INTRODUCTION

I am a dedicated Frontend Developer with over five years of experience in developing responsive user interfaces and maintaining scalable web applications. My expertise lies in crafting seamless and user-friendly experiences using modern technologies like ReactJS, Redux, and TypeScript. I excel at collaborating in agile teams, solving complex problems, and delivering high-quality software solutions that meet client expectations. My passion for continuous learning ensures I stay updated with the latest industry trends and best practices.

## EXPERIENCE

Frontend Developer, CanopyLAB International ApS (*October 2024 - July 2025*)

Frontend Developer, Cherry Solutions (*July 2024 - September 2024*)

Frontend Developer, Sutrix Solutions (*February 2020 - June 2023*)

Frontend Intern, Saigon Lab (*October 2019 - January 2020*)

## PROJECTS

*CanopyLAB International ApS*

*Frontend Developer | October 2024 - July 2025*

### Ganax

- Description:

The ultimate platform for influencers and brands to connect, collaborate, and create impactful campaigns.

Whether you're an influencer looking to monetize your reach or a brand seeking authentic partnerships, Ganax is here to help you succeed.

- Position: Frontend developer

- Technologies:

- ReactJS, Redux
- React-bootstrap, Sass

- Main Scenarios:

- As a brand: View and filter campaigns; Create and edit campaigns, including posting on social platforms with AI-validated requirements; Monitor performance and insights for each campaign;
- As an influencer: Connect social media accounts; Browse and join available campaigns; Post campaign videos on social platforms with AI validation; Track earnings;
- As a user: Sign up or log in, manage profile and settings; Explore available campaigns and featured influencers; View all campaign-related posts from social platforms in a masonry-style infinite scroll layout.

- Main responsibilities:

- Implement UI/UX and functionalities for the platform
- Integrate api with backend team
- Deploy code to server with Jenkins
- Check and fix bugs

## *Cherry Solutions*

*Frontend Developer | July 2024 - September 2024*

### **Cloud-Based Container Stowage Planning**

- Description:

A revolutionary cloud-based container stowage planning solution. Introduced advanced AI/ML-driven planning capabilities, enhancing operational efficiency.

A platform virtualizes data of route stowages, containers, and loads, simplifying the planning process, manages documents and workflow.

- Position: Frontend developer

- Technologies:

- ReactJS, MobX, react-hook-form
- Material UI

- Main responsibilities:

- Analyze the requirements for new features, enhancements,...
- Meeting with team to break down tasks and discuss flow with the backend team, then estimate the time for every task.
- Implement UI/UX and functionalities for the platform
- Integrate api with backend team
- Deploy code to server with Jenkins
- Check and fix bugs
- Check and answer client questions

## *Sutrix Solutions*

*Frontend Developer | February 2020 - June 2023*

### **Learning management system**

- Description:

This is a multi-language learning platform for organizations (exp: high schools, universities , companies,...) to register and create a learning space for their members to join.

It has 2 source codes, one for the main learning platform and one for the payment service. There are some awesome features: creating or editing a draft course, publishing course, previewing and taking a course to learn, posting on the wall or newsfeed like Facebook, chatbot introducing member to create or edit a course...

- Position: Frontend developer

- Technologies:

- ReactJS, Redux, Redux thunk, Formik
- React-bootstrap, Sass

- Main responsibilities:

- Analyze the requirements for new features, enhancements,...
- Meeting with team to break down tasks and discuss flow with the backend team, then estimate the time for every task.
- Create and style UI for main platform and payment service page
- Create responsive Django email templates
- Integrate api with backend team
- Deploy code to server with Jenkins
- Check and fix bugs
- Check and answer client questions

### **Microsoft widgets tool**

- Description:

A platform helps employees in an organization manage their information on different Microsoft services, like outlook, planner, teams,...

- Position: Frontend developer

- Technologies:

- ReactJS, Redux toolkit, Typescript, React grid layout, React hook form
- Tailwind
- Microsoft graph client

- Main responsibilities:

- Analyze the requirements of new features
- Organize and create reusable components
- Create responsive UI
- Integrate Microsoft graph api
- Check and fix bugs

### **Booking DJ landing page and management page**

- Description:

A platform manages djs, planners, event bookings.

- Position: Frontend developer

- Technologies:

- Vue, Vuex
- bootstrap-vue, sass

- Main responsibilities:

- Analyze the requirements of new features
- Maintain and create new features
